Address: 12 Vermeer Street, Bellville, Cape-Town, 7530

EXPERIENCE
January 2022 – Current

- Architected, developed, and maintained **5+ client web applications** using the **MERN stack** (React.js, Node.js, Express.js, MongoDB) and related frameworks.
- Engineered and deployed **RESTful APIs** for core application logic and successfully integrated critical third-party services, including the **Yoco payment gateway**.
- Collaborated directly with **UI/UX designers** to translate high-fidelity designs into dynamic, user-friendly interfaces using **React components.**
- **Yoco payment integration.**
- **Helped one client with Cyber Security** to ensure secure application deployment and maintenance and tracking open api end points.

Computer Technician, Mafube Local Municipality

November 2019 – February 2020

- Managed **IT infrastructure** and provided technical support. Responsibilities included diagnosing hardware/software issues , system maintenance (upgrades/backups) , and ensuring network connectivity via routers and switches.
